FOREWORD

The National Institute of Statistics, through its Regional Littoral Office, is pleased to present the first publication of the "**Littoral in figures**", 2022 edition.

The "**Littoral in figures**" briefly presents the region and is now part of the publications of the Regional Office, alongside the regional statistical yearbook. This approach is part of the general framework of the National Strategy for the Development of Statistics (NSDS) whose major objective is to provide Cameroon, including the region, with an effective Regional Statistical Information System (RSIS) to meet the needs of the user community.

The 2022 edition of the "**Littoral in figures**" benefited from the contribution of all the administrations producing statistical information at the regional level. This collection of statistical information is structured around the four pillars of the National Development Strategy 2020-2030 (NDS30). It is comprised of 15 chapters with 05 main parts: general information, structural transformation of the economy, development of human capital and welfare, promotion of employment and social inclusion, and governance, decentralization and strategic management of the State.

This document makes available to readers the data in the form of tables, figures and maps relating to all areas (political, economic, social and cultural) of the Littoral region. For detailed information, readers are invited to consult the website of the NIS (www.ins-cameroun.cm) and the statistical yearbook of the Littoral region.

The Institute of Statistics extends its appreciation to the RSIS for its frank collaboration and is open to comments and suggestions for improving subsequent editions.

Part Three: STRUCTURAL TRANSFORMATION OF THE ECONOMY

Structural transformation of the economy requires a densification of manufacturing and high-productivity service sectors and technological catch-up, resulting in higher productivity in agriculture and its modernization, as a result of increased demand for agricultural products.

Part IV: EMPLOYMENT PROMOTION AND ECONOMIC INTEGRATION

The employment situation is characterised by underemployment, the rate of which rose from 70.6% in 2010 to 77.0% in 2014, i.e. an increase of 6.4 points, at odds with the trajectory set out in the GESP which aimed to bring it below 50% by 2020. To address employment-related shortcomings, the Government developed a National Employment Policy in 2017.

Part Five: GOVERNANCE, DECENTRALIZATION AND STRATEGIC MANAGEMENT OF THE STATE

Good governance improves the business climate and promotes sustainable investment. It allows fair competition between operators and results in a strengthening of tax citizenship. It also encourages entrepreneurship and risk-taking by national and international investors.
