FOREWORD

The process of Decentralization and decentralization initiated by Cameroon many Years ago; as well as the realization of the region as a territorial unit of spatial Development and reinforces the need for precise knowledge of immediate regional Statistical information on the social and Economic environment.

In accordance with its Missions in terms of collection, Centralization and production of Statistical Information, the Regional Agency of the National Institute of Statistics (NIS) west is thus developing the **2023 Edition of the Statistical Yearbook of the West Region**

This Statistical document contains numerical data reflecting activities in various areas of the west Region. The Regional Statistical directory is intended to be a valuable tool to assist in decision-making regarding orientation, planning, good governance and the promotion of coherent and sustainable development; at the service des regional and local decision-makers; as well as any other use of Statistical information; in order to have a clear and precise ideas of the economic, political and social sectors of the western Region.

The information contained in this document comes from statistical Surveys and Censuses. They are also the result of a general collection of information from prefectures; Regional delegations and structures. In this regard; the National Institute of Statistics (NIS) would like to express its gratitude to all those responsible for these structures; who were kind enough to provide us with all the data within their competence and who contributed to the drafting of this document. It will be interested in receiving any comments or constructive suggestions that could help improve it.

FIRST PART :TERRITORY AND CLIMATOLOGY

Chapter 1: PHYSICAL PRESENTATION OF THE WEST REGION

1.1 Presentation:

This chapter gives an overview of the physical setting, the geographical situation and territory of the WEST Region. It highlights the region's main natural assets (relief, pedology, vegetation and hydrography).

1.2 Méthodology

The methodology used here is the extraction of data from the West regional Delegation of MINTP, West Regional Delegation of MINEPAT, MINATD and the West regional Delegation of MINADER.

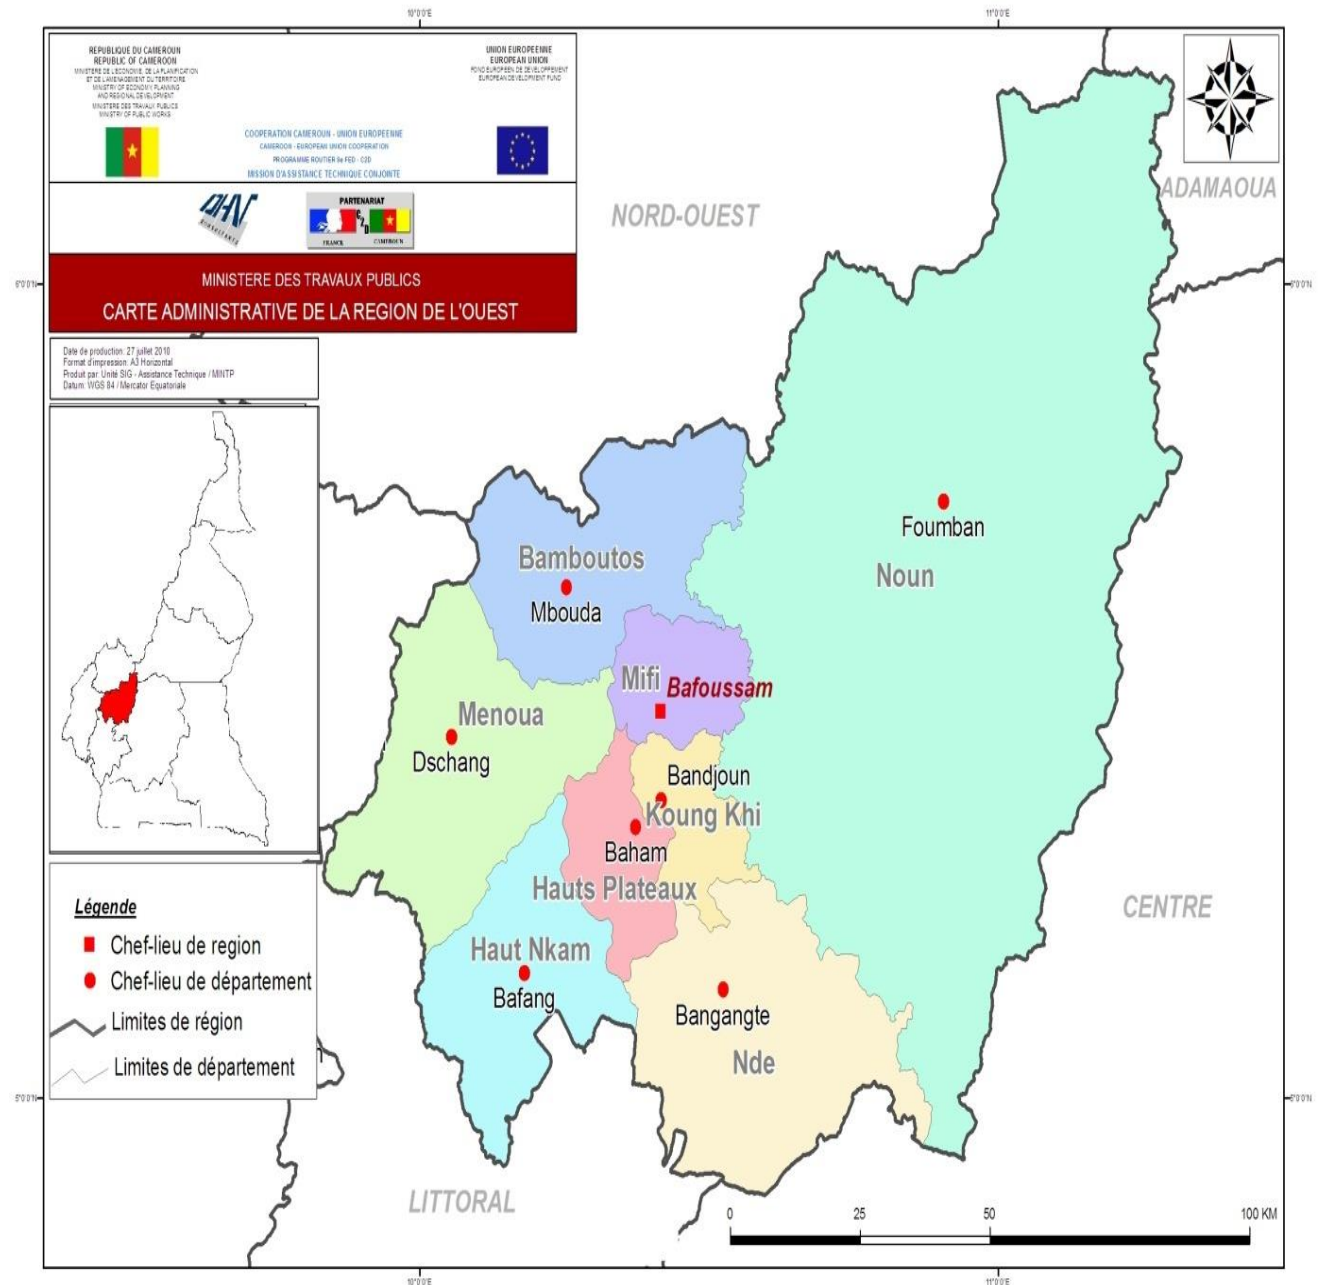

1.3 Sources of documentation

The information in the following tables is taken from the activity reports of the West regional Delegation of MINTP, MINEPAT and MINADER..

1.4 List of table

1.5 Geographical Situation and the surface area of the West Region.

1.6 The Region’s geography and surface area

The west Province was borned by a presidential decree N° 72/349 bearing an administrative organization of the United Republic of Cameroon. Hence, the transmission of provinces to Régions in Cameroon was created according to Decree N° 2008/376 of 12 November 2008 transforming the provinces into Région, whereas, west as an inclusion. It’s capital is Bafoussam, with a surface area of 13,892 km², and is located in the central-western portion of the République of Cameroon.

1.6 Geographical location

The West region is bordered in the North and North-West by the North-West region, in the West by the South-West region, in the South by the Littoral and Centre Regions, in the East by the Centre and Littoral Regions, and in the North-East by the Adamawa Region.

It is the smallest in the country, covering an area of 13,892 km², i.e. 3% of the national territory, and is located in the northern hemisphere between the parallels 5° and 6° 15 and the meridians 10° and 15° of Greenwich.

1.7 Surface Area

The surface area of the west Région is 13,892 km

1.1.1 Ecological areas

Relief

The relief of the West region is mountainous with numerous plateaus and plains. It is basically hilly and characterized by the three main areas below:

- The mountain ranges of the North with the main peaks being the Bamboutos Mountains (2,740 m altitude), Mbam Mountains (2,263 m), Mount Bana (2,700 m), Mount Kogham (2,263 m) and Mount MBapit (1,970 m).
- The high plateaus with an altitude of 1,500 m and which cover the Mifi, Nde, Upper Nkam divisions and part of Menoua. The Mbos plain in Menoua, the Noun plain between Nde and Noun and the Mape Basin in the Noun:

- **Physical environment: Pedology, climate and Temperature**

The West region has a varied pedology characterized by very fertile volcanic soils in Foubot and part of Bafoussam; and lateritic brown soils in the melting pot of the divisions. Alluvial soils occupy the smallest areas, while valleys and lowlands cover the Mbos plain in Santchou. Climate is generally mild with an average temperature of 20 °C and is of the tropical Sudanese-Guinean type, characterized by a rainy season from May to October. The high humidity of the area is combined with the high frequency of persistent rainfall. It is of the tropical Sudanian type with two main seasons: a dry season from November-December to May-June, and a rainy season from June-July to November-December. Temperatures vary between 18 °C and 30 °C on average with a strong daily variation. The average temperature is 25 °C.

1.1.2 : Vegetation and Hydrography

Vegetation is mainly grassy savannah with gallery forests and the soils are mostly of volcanic origin.

The following rivers flow through the West region:

- The Nkam, swollen by the Menoua and rising in the Bamboutos.
- The Noun, a tributary of the Mbam and rising in the North-West.

The Mbam, which is fed by the Mape and rises in the mountains separating Cameroon from Nigeria, and finally the Nde.

Chapter 2: INSTITUTIONAL, ADMINISTRATIVE AND POLITICAL ORGANIZATION

2.1 Presentation

Administrative and Judicial Organization

The West region, which is headed by a Governor, has eight (8) divisions and 40 sub-divisions. The vast majority of senators in the West region are men (90%) as against 10% of women.

Furthermore, in 2016, more than half of the Members of the Lower House of the Parliament (64%) were men and women represented 36%. CPDM Members of the Lower House occupied 80% of the seats, followed by the CDU (16%) and the SDF (4%). The West had 41 mayors, of whom 38 were men and 3 were women. There were 1,219 municipal councillors, 76% of whom were men and 21% women.

The total number of 2nd class traditional chiefdoms was 122 spread over the eight divisions.

Some historical landmarks of the West region

- 1 **1993:** establishment of the University of Dschang
- 2 **17 January 2008:** the Bafoussam City Council (City of Bafoussam) was created through Presidential Decree No. 2008/022 of 17 January 2008. As stipulated in Article 2 (paragraph 1) of this decree, the Bafoussam City Council is comprised of the 3 following councils:
 - the Bafoussam I council (Bafoussam I subdivisional council) with head office in Bafoussam;
 - The Bafoussam II council (Bafoussam II subdivisional council) with head office in Baleng; the Bafoussam.

2.2 Methodology

This chapter is based on the report of the 30 September 2013 elections in the West region provided by the Regional Delegation of ELECAM-West, the updated file of the divisions, subdivisions and councils of the West region, the Governor's Office, the sheet of

the Regional Representation of Cameroonian Bar Association and the 2014, 2015 and 2016 activity reports of the West regional Delegation of Penitentiary Administration. .

2.3 Sources of documentation

The four following sources of documentation provided the data for this chapter:

- the 30 September 2013 elections report in the West region provided by the West regional Delegation of ELECAM;
- the updated file of the divisions, subdivisions and councils of the West region from the Governor’s Office;
- the sheet of the Regional Representation of Cameroonian Bar Association; the 2014, 2015 and 2016 activity reports of the West regional Delegation of Penitentiary Administration.

2.4 Organisation Administrative

La Région de l’Ouest a pour Chef-lieu Bafoussam et comprend 8 départements qui sont: Les Bamboutos, le Haut-Nkam, les Hauts-Plateaux, le Koung-Khi, la Mifi, la Menoua, le Ndé et le Noun. Cette Région compte 40 Arrondissements.

2.6 Traditional Organization.

2.7

The Western region includes 11(eleven) 1st Degree Chiefdoms, 116 2nd degree Chiefdoms and 1309 3rd Degree chiefdoms.

I) ETHNIC GROUPS

Several ethnic groups are present in the West region : The **BAMILEKE**, The **BAMOUN**, The **MBO**, The **FOULBE**, The **PEULS** and The **TIKARS**. The Majorities of the **Ethnics** are the **BAMOUNS** and the **BAMILEKEs**. The **BAMOUNS** occupy the **NOUN** division. Both the **BAMELIKE** and the **NOUN** constitute the majority of the population of the other seven divisions. The **BAMILEKE** and the **BAMOUNS** practice ancestor Worship and politico-religious organization and marked by the presence of several secret societies of an initiatory nature. The habits and Customs of the two ethnic groups are very close, although the **BAMOUNS** are predominantly Muslems and the **BAMILEKES** Christians or animist. The communities in these two ethnic groups are organized around Kings (senior chiefs) who are holders of ancestral powers .The King reigns assisted by a council of Notables

I.1 The Origin of the **BAMILEKEs**

The Bamilikes are said to be the desendants of the **BALADIS** who left Medieval Egype in the 9th century . The **BALADIS** arrived in thye Tikar region around the middle of the 12th century before dividing around 1360 on the death of their last Sovereign, king **NDEH. YENDEm** first Prince, refuse the Throne and cross the **NOUN** river to found the

BAFOUSAM Kingdom. Her younger sister, in the same migratory impulse, will go towards the BANSO region. From Bafoussam, almost all other BAMILIKE groups were born between the 15th century and the 20th century. The BAMILIKE identify themselves by their origin with that of ancient Upper Egypt.

. The Figurative Meaning of the Mbamilike is as follows: Descendants of the ancient Egyptians.. The word « **Bamiléke** » is a modern designation, to facilitate reading in western languages. **BA' Mieh Lah Ke'** and the name closest to the original pronunciation. The literal meaning of the word « **Bamiléke** » sound by sound is as follows:

BA' : The, Those of (to designate the geographical origin of someone)

Mieh : The brothers

Lah : The country, The Region.

Ke' : Upper, the Top, What is at the top of a place, a region, a land.. Haut High when talking about a country or a region in Africa, they are Upper Egypt.

Two different Hypotheses, dating from the time of the Colonization of Cameroon, once again explain the origin of this name. The first asserts that Douala interpretation is at the origin of the word **Bamileke**. According to this version, the word Bamileke comes from the term "**Babote Ba leke**" which would mean "*face mask wears*". The second maintains that the word "**Bamiléké**" comes from the expression of the language FOTO (region of Dschang) "**Pe me leke**" which means "*the inhabitants of montague's and the Ravines*". It is the letter which is almost often retained.

Political organizations

Several legal political parties coexist in the West Region. The region's political parties represented in the National Assembly are :

CPDM: Cameroonian People's Democratic Movement;

UNDP: National Union for Democracy and Progress

MDR: Movement in Defence of the Republic;

USM: Union of Socialist Movements ;

UD: Cameroon Democratic Union;

SDF: Social Democratic Front ;

MCNC (NPPC): Mouvement Citoyen National Camerounais (National program for Peace in Cameroon).

Chapter 3 : CLIMATOLOGY

3.1 : PRESENTATION

3.2 Overview

This chapter gives an overview of the climate setting, of the west Region.

climatical nature of the Region

The climate of the West Region is generally mild with an average temperature of 20 °C and is of the tropical Sudanese-Guinean type, characterized by a rainy season from May to October. The high humidity of the area is combined with the high frequency of persistent rainfall. It is of the tropical Sudanian type with two main seasons: a dry season from November-December to May-June, and a rainy season from June-July to November-December. Temperatures vary between 18 °C and 30 °C on average with a strong daily variation. The average temperature is 25 °C.

The annual level of precipitation varies between 1500mm and 2500mm with an annual average of 1871mm.

Vegetation and Hydrograph.

Vegetation mainly consists of grassy Savannah with gallery forest and the soils are mainly of volcanic origin.

The following Rivers water the Western Region:

The Nkam swelled by the Menoua and taking source in the Bamboutos.

The Noun, a tributary of the Mbam and its source in the North-West.

The Mbam receiving the Mape and taking its source in the Mountains which separate Cameroon from Nigeria and finally the Nde.

3.3 Methodology

The methodology used herein is an exploitation of data from the West Regional Delegation of MINEPAT.

3.4 Source of documentation

The information presented in this chapter was obtained from the West Region socio-economic and development opportunities report.

PART TWO : POPULATION AND SOCIAL AFFAIRS

Chapter 4: CHARACTERISTICS OF POPULATION

4.1 : Presentation

The population of the West region was 1,720,047 in 2005, representing 9.9% of the Cameroon population. It was estimated at 1,785,285 in 2010 and 1,892,545 in 2014; with 53.2% women and 46.8% men.

In 2015, the population of the West region was estimated at 1,795,308, of which 839,845 were men and 955,463 women. This population is composed of the following ethnic groups::

- several ethnic subgroups spread over the seven divisions on the right bank of the Noun;
- the Bamoun, comprised of one tribe and spread over the left bank of the Noun in the division of the same name;
- The Tikars settled in Magba and finally the Mbo concentrated in Santchou and Kekem. The Foulbe and Peuhl are two ethnic groups found in the Bamboutos and Noun divisions.

In terms of surface area, Noun is the largest division with 7,687 km² and Koung-Khi the smallest with only 353 km². In 1987, the Mifi division was the most densely populated (about 503 hbts/km²) while the Noun division had the lowest density (38 hbts/km²). The density of these two divisions stood respectively at 750 and 59 inhabitants per km² in 2005, 778 and 61 inhabitants per km² in 2010:

4.2 Methodology

The information presented in this chapter was collected by using two main sources, namely the main report of the 3rd GPHC of 2005 and the BUCREP population projections, 2014 edition.

2.1 Definition

Population Density: It is an indicator that presents the relationship between a population and the surface area where this population lives.

Population density is obtained by dividing the total population by the surface area of the territory, and is usually expressed in inhabitants per km²

Population: This is the number of people residing in a territory on a given date. The same definition was used in the 1976 and 1987 censuses.

Urban/rural population: Any population living in a district, a subdivision, a division or a region and/or a locality with at least 5,000 inhabitants and equipped with a secondary or post-primary school, a health unit, a functional water supply and a daily market. In contrast, a locality with fewer than 5,000 inhabitants and without the above-mentioned facilities is considered rural.

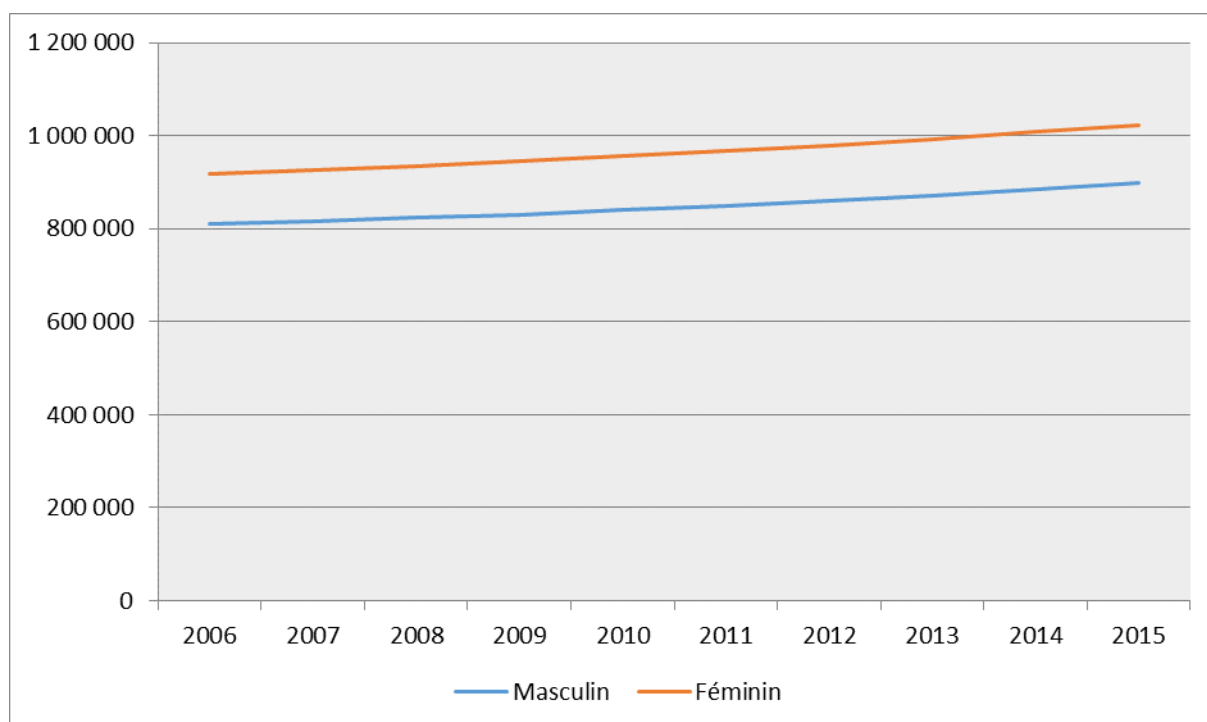

4.3 : Sources de Documentation

The data contained in this chapter are drawn from the Main Report of the 3rd GPHC of 2005, the BUCREP Population Projections of 2014 and the NIS Projections.

Chapter 5 : HOUSING AND LIVING CONDITIONS

5.1 Presentation

In the West region, data on urban planning are mainly related to administrative urban planning documents and land titles.

5.2 Methodology

The information presented in this chapter was obtained by using the 2018, 2019 and 2020 activity reports of the MINDHU-West regional Delegation, the 2018, 2019 and 2020 reports of the MINDCAF Divisional Delegations and a sheet obtained from the HYSACAM/West regional Representation as well as ECAM3 and ECAM4 survey reports.

5.3 Sources of documentation

The information contained in these tables is drawn from the 2017, 2018, and 2019 activity reports of the West regional Delegation of MINH DU, Divisional Delegations of MINDCAF and West regional Representation of HYSACAM

Chapter 6 : EDUCATION AND RESEARCH

6.1 Presentation

The education data in this chapter covers three (3) sectors, namely Basic, Secondary and Higher Education.

The Regional Delegation of Basic Education is responsible for the following two types of education: Nursery and Primary Education.

During the 2018–2019 school year, the nursery system had 1,111 schools - 703 of which are public and 408 private – 1,922 classrooms, 3,073 teachers and 69,472 pupils. This was a ratio of about 23 pupils per teacher. At the primary level, there were 2,146 schools, of which 1,497 were public and 649 private, 11,911 classrooms, 12,121 teachers and 564,583 pupils, i.e. a ratio of about 47 pupils per teacher.

For Secondary Education in the West region, during the 2018–2019 school year, the total number of students in Technical Secondary Education in the West region was 76,835. As for General Secondary Education, there were 200,255 students.

The Government Technical Teachers' Training College is only present in the Mifi Division. This school had 669 teacher students in the 2018–2019 school Year.

Data on higher education relate to the University of Dschan

6.2 Methodology

To draft this chapter, the Regional Statistical Yearbook of MINEDUB for the 2018–2019 school years for Basic Education, divisional activity reports for the 2018–2019 school year for Basic Education, 018 and 2019 School Maps for the West regional Delegation of Secondary Education Region, personnel and students file of the University of Dschang for the 2017–2018, 2018–2019 academic years were used

6.3 Source of documentation

Four sources of data were used for this chapter:

- 1 —MINEDUB’s Regional Statistical Yearbook for the 2018–2019 school years for Basic Education;
- 2 —Divisional activity reports for the 2018–2019 school year for Basic Education;
- 3 —2019 and 2020 School Maps for the West regional Delegation of Secondary Education;
- 4 —the population projections made by the NIS;
- 5 —personnel and student file of the University of Dschang for the 2017–2018 and 2018–2019 academic years.

Chapter 8 : EMPLOYMENT AND INCOME

8.1 Presentation

The number of job seekers in 2018 was 564. According to the different socio-occupational categories, the largest number of job seekers are manual workers (225), followed by first-line supervisors (119), senior managers (79) and workers (75). As regards placements, manual workers (17) and semi-skilled employees/workers (16) are the most numerous to have been placed in a job through the West regional Delegation of MINEFOP.

NEF

Between 1 January and 31 December 2018, the National Employment Fund (NEF) received and guided 3,247 candidates, of which 1,852 were men and 1,395 were women, including 383 senior staff, 753 first-line supervisors and 2,111 executing agents.

Out of a total of 2,505 positions offered by the NEF, 2,005 placements were made, with a completion rate of 80.04%. In the distribution according to the socio-professional category, sales agents came first with 606 placements followed by the building trade (546).

8.2 Methodology

The information outlined in this chapter was drawn from the activity reports of the West regional Delegation of MINEFOP and the data file from the NEF Representation for the West region.

8.3 Definitions

Socio-professional category: Element of the division of the working population¹ into groups with a certain social homogeneity. To build these groups, the following are used:

-profession or individual trade practised;

Chapter9: WORK, SOCIAL PROTECTION AND INSURANCE

9.1 : Presentation

In the social security sector, the National Social Insurance Fund covers three branches of social security: Family benefits, old age, disability and death pensions and occupational risks.

9.2 Methodology

Data was collected at the Regional Delegation of labour and Social Security for certain indicators relating to health and social action and at the Bafoussam Social Security Centre for changes in benefits paid, changes in the registration of new workers, changes in technical products of the occupational risks branch and changes in declarations of occupational accidents.

9.3 Definitions

Benefit: Entitlement in cash or in kind provided to a social insured person, his/her spouse, descendants or ascendants.

Allowance: Social security benefit paid either periodically (family allowance) or in a lump sum (old age).

Pension: Periodic benefit paid in respect of old age, disability and death.

Pensioner: All beneficiaries of pensions under old age, disability and death insurance.

Registration: Administrative operation involving the allocation of an identifier to workers or employers.

Registered worker: A worker who is affiliated to the scheme and to whom an identifier is assigned.

Employer: A natural or legal person who uses one or more workers on a permanent, temporary or occasional basis in return for remuneration.

9.4 Sources of documentation

The reports of the Regional Delegation of labour and Social Security and Bafoussam Social Welfare Centre for the period from.

Chapter 10 : JUSTICE

10.1: Judicial organisation

According to Law No. 2006/015 to organize the judiciary, in terms of territorial jurisdiction, a Court of Appeal is created within each region; at the level of each Division, a High Court. Basically, at the level of the Subdivision, there is a Court of First Instance. However, the application is not applied in all the Subdivision as the logic goes. Furthermore, depending on the needs of the service, a High Court can cover several Divisions and a Court of First Instance can cover several subdivisions. Such is the case of the High Court of Mifi which covers two divisions, namely MIFI and the Upper-Plateaus, and the Court of First Instance of Bafoussam which covers all the jurisdictions of the High Court of MIFI and the Upper-Plateaus.

The jurisdiction of the Court of Appeal includes the following administrative and judicial courts: the Court of Appeal, Administrative Court, High Court of Mifi, Court of First Instance of Bafoussam, High Court and Court of First Instance of Bafang (Upper-Nkam), High Court and Court of First Instance of Bagangte (Nde), High Court and Court of First Instance of Mbouda (Bamboutos), High Court and Court of First Instance of Dschang (Menoua), High Court and Court of First Instance of Foumban (Noun), Court of First Instance of Foubot, Military Court (special jurisdiction).

It should also be noted that the Court of Appeal is a court of second instance. The other courts of first instance and the Administrative Court are under ordinary law. Only the Military Court of Bafoussam is an exceptional court.

In 2018, the West region had 1 central prison (Mifi Division), 07 main prisons (Bamboutos, Upper-Nkam, Upper-Plateaus, Koung-Khi, Menoua, Nde and Noun divisions) and 2 production prisons (Nde and Noun divisions).

10.2: Methodology

This chapter is based on the report of the 30 September 2013 elections in the West region provided by the Regional Representation of Cameroonian Bar Association and the 2014, 2015 2016 and 2022 activity reports of the West regional Delegation of Penitentiary Administration.

10.3 Definitions

Appellant: Someone who is appealing against a court's decision after they have been judged guilty of a crime.

Convicted: To officially find or declare (someone) guilty of a crime.

Defendant: A person or group that has been charged with a crime or is on trial.

Central prison: Prison located in the regional capitals. It is mostly used as a selection and orientation prison.

Secondary prison: Prison located in the sub-divisional administrative centres. However, some of them, depending on the volume of activities, are located in the divisional administrative centres.

Production prison: Prison located in areas of productive activities (agriculture, livestock, fishing).

10.4 :Sources of documentation

The four following sources of documentation provided the data for this chapter:

- The sheet of the Regional Representation of Cameroonian Bar Association; the 2014, 2015 and 2016 activity reports of the West regional Delegation of Penitentiary Administration.

Chapter 11 : CULTURE, TOURISM AND LEISURE

11.1 Presentation

Culture is one of the means of promoting and maintaining economic growth. In Cameroon and particularly in the West region, there are several types of artists: musicians, photographers, visual and graphic artists, poets, playwrights and actors, producers, directors and performers.

11.2 Methodology

The methodology used here consisted in collecting data from the services of the West regional Delegation of Arts and Culture. This was done by submitting a questionnaire which was subsequently filled in by officials of this structure.

11.3 Definitions

Culture: According to UNESCO, culture is a set of distinctive spiritual, material, intellectual and emotional features of society or a social group. It encompasses, in addition to art and literature, lifestyles, ways of living together, value systems, traditions and beliefs. (UNESCO 2001).

Museum: According to the International Council of Museums (ICOM, 2007), a museum is a "non-profit, permanent institution in the service of society and its development, open to the public, which acquires, conserves, researches, communicates and exhibits the tangible and intangible heritage of humanity and its environment for the purposes of education, study and enjoyment".

11.4 Sources of documentation

The information in this chapter is drawn from the reports of the West regional Delegation of Arts and Culture.

CHAPTER 12: YOUTH AND SPORT

12.1 Presentation

MINJEC

Between 2012 and 2015, the number of staff at the West regional Delegation of the Ministry of Youth and Civic Education (MINJEC-WEST) increased from 130 civil servants and state employees, including 37 women, to 237 staff, including 88 women. This number was 220 civil servants and state employees including 82 women (in 2013) while in 2014 it was 253 including 89 women.

In 2016, the West regional Delegate of Youth Affairs and Civic Education had 262 civil servants and state employees, including 102 women.

MINSEP

The data on sport is only related to the Upper-Nkam, Bamboutos, Upper-plateaus, Koung-khi and Noun divisions. Upper-Nkam has 330 licence holders, 24 team managers, 24 referees, 34 playgrounds and 13 affiliated clubs in 21 disciplines. Bamboutos has 306 licence holders, 24 team managers, 24 referees, 21 playgrounds and 19 affiliated clubs in 20 disciplines. The Upper-Plateaus has 248 licence holders, 13 team managers, 15 referees, 4 playgrounds and 17 affiliated clubs in 20 disciplines. Koung-khi has no licensees, only 2 team managers and 2 referees, one playground and 4 affiliated clubs for a total of 21 disciplines and Noun has 298 licensees, 14 team managers, 17 referees, 06 playgrounds and 11 affiliated for a total of 20 disciplines. For the years 2016 and 2017, the sports data were collected from all divisions except Upper-Nkam. Thus, MIFI has the highest figures, as follows: 13 playgrounds, 18 affiliated clubs, 366 license holders, 114 team managers, 70 referees for a total of 20 disciplines.

12.2 Methodology

The data in this chapter was collected from databases provided by the MINJEC Regional Delegation and MINSEP.

12.3 Sources of documentation

The data in this chapter was collected from work reports and files provided by the MINJEC and the MINSEP Regional Delegations.

PART THREE : ECONOMICS ACTIVITIES

Chapter 15 : AGRICULTURE

15.1 Presentation

Agriculture is one of the main activities in Cameroon and the Western Region According to the results of the Supplementary Survey to the fourth Cameroon After Household Survey (EC-ECAM 4) carried out in 2016 by the INS, 06 employed workers out of 10 (61.1%) in the Western Region are in the agricultural informal sector.

The food crop production of the Western Region in 2021 consists of cereals such as maize and beans on the one hand, and tubers such as cassava, sweet potato and potatoes on the other.

Production, exploited areas, and the retail price of certain speculations are presented in this chapter.

15.2 Methodologie

The methodology used here consisted of collecting the data from the services of the Regional Delegation of MINADER-West to extract the data relating to the production and area of the main food crops in the Western Region This was done by the submission of the questionnaire which was subsequently completed by those responsible for this structure.

15.3 Sources de documentation

The information contained in these tables is taken from the reports of the Regional Delegation of MINADER-West.

Chapter 16: BREEDING AND FISHERIES

16.1 Presentation

Livestock farming in the western region is dominated by Cattle, sheep, Goat, Pigs and poultry. Other type of breeding such Dogs, felines and Fish farming are also practiced. The information obtained reveals that in 2021, the Noun Division stands out in terms of Breeding and production of certain Livestock. This Division produces 76% cattle in the Western Region or 90622 out of 118218 for the entire region.

It produces 38% of Table Eggs or 68500382 Eggs compared to 174820529 for the entire region. The MIFI Division produces 48% of Honey from the entire region, or 3640L for the entire region. This chapter presents the main Livestock (cattle, Sheep, Goats Poultry etc) in the region distributed by Division, including the number of livestock, meat production and the Animals production situation in 2021.

16.2 Methodology

The information here was provided by the regional Delegation for Fisheries Breeding and Animal industries

16.3 Sources of documentation

The Data appearing in the following tables are taken from the Statistical reports from the Regional Delegation for Fisheries and Animal industries of West Region.

Chapter 17: ENVIROMENT – WILDLIFE AND FOREST

17.1 Presentation

From 2018 to 2021, The Western region has 25 forest reserves and 16 reforestation perimeters respectively covering an Area of 38.978 hectares and 2546 hectares. The forest curenly classified represents only barely 3% of the Area of the Region (13.980 km).

It should be noted that in the west Region, there is no Timber exploitation.

17.2 Methodology

The information presented in this chapter was obtained by using documents produced by the Regional delegation of MIMFOF on the different protected Species and Reforestation

17.3 Source of documentation

The Data appearing in this are provided by the Regional Delegation of MINFOF/ West.

Table 17.2 : Classified forest by division in 2021

Divisions	Designation	Stop Classification	Surface area (ha)	Observations
MIFI	Forest Reserve of Kouabang	93/390 of 7/4/93	141	Classified as compensation for the Bamougoum forest reserve for the required delimitation.
	Forest Reserve of Baleng	N° 53 of 01/03/1934	309	Its invasion by the population led to the establishment of the participatory management committee
NDE	Forest Reserve of Balengou	N°79/506 of 8/12/1979	312	Partly reforested
	Plains forest reserve of Noun	N°05 of 8/12/1979	1400	reforest
	Forest Reserve of Baloungou	N°05 of 8/12/1934	100	Requested extension
	Forest Reserve of Nkouyaman	N°79/506 of 8/12/1979	716	Not reforested and not delimited
	Forest Reserve of e Nzemabou (Nkoutouop)	N°79/506 of 8/12/1976	2540	Not reforested and invaded by farmers
	Forest Reserve of Metche-Ngoum	N°262 of 29/07/1947	6500	Straddling the Nkam and the Haut-Nkam
	Forest Reserve of Mongoue-Nkam	N°262 of 29/07/1947	1200	Straddling the Nkam and the Haut-Nkam
	Forest Reserve of Tsena-Nkam	N° 262 of 27/07/1947	2600	Invaded by farmers
	Forest Reserve of e Maha	N° 262 of 29/07/1947	460	Invaded at 20%20%

Divisions	Designation	Stop Classification	Surface area (ha)	Observations
HAUT-NKAM	Forest Reserve of Fiba-Mahou	N°262 of 29/07/1947	6500	Invaded at 90%
	Forest Reserve of Moa	N° 262 of 29/07/1947	300	Invaded at 20%
NOUN	Forest Reserve of Koutaba	N°122 of 12/05/1934	200	, Reforested requires expansion, threatened by bush fire
	Forest Reserve of Koutchankap	N°431 of 28/12/1935	400	A reforested
	Forest Reserve of u Mou	N°503 of 23/12/1947	300	Invaded by the cultivators
	Forest Reserve of Ngambouo	N°503 of 23/12/1947	600	Invaded by the cultivators
	Forest Reserve of Mélap	N°224 of 17/07/1934	1705	Completely reforested
MENOUA	Forest Reserve of e Foreké-Dschang	N°262 of 22/07/1947	2200	Threatened with invasion
	Forest Reserve of Ménoua-Quiquina	N°334 of 08/11/1934	100	Pygmen Plantation, Voacanga, Destroyed by the population
	Forest Reserve for Signal for Dschang	N°63 of 06/06/1956	50	Total Destruction of cinchona by the Population
	Protected slopes of hills of Foreké-Dschang	N°63 of 06/06/1956	3000	Plantation of eucalyptus, cypress, pinus etc... partly invaded
	WILDLIFE reserve of Santchou	N° 262 du 29 July 1947 in forest reserve Stop N° 3335/A/SE TOUR/DFP	7000	The wildlife species here are : Mammals (yellow backed duiker, blue duiker, Vervet, common genet, Potto de Bosman, patas), Reptiles (Varan), rongeur (Arthurus), Avifauna (<i>Phyllanthus</i>

Chapter 18: WATER AND ENERGY

18.1 Presentation

In 2022, the update release for consumption has a cumulative of 98630.6m³ for the super ones, 27045.9m³ for the domestic gas. The receipts of Petroleum products in 2022 are established as follows: 101746m³ for Super, 26825m³ for Petroleum, 100707m³ for Diesel and 8606m³ for the Domestic gas.

The number of marketers in the west region fell between 32.

Speaking of water, the western region has 15 water emission centers in 2022. The quantity of water emitted is 1268171m³ for 59772 subscribers. Bafoussam records the greatest emission, (8998919m³ the center of Kekem has the lowest emission with 23032m³.

Regarding electrical energy in the western region, Electrification work is in progress.

18.2 Methodology

The information contained in this chapter is obtained from an exploitation of data provided by the Regional Delegation of Water and Energy (MINEE) for the West, the Regional Representation of the SCDP for oil, the Agency Regional CAMWATER for West.

18.3 Sources of documentation

The data used for the development of this chapter comes from the Regional Delegation of MINEE/ West, a report from the Regional water Agency (CAMWATER)

Chapter 19 : INDUSTRIES

19.1 Presentation

Industry

Industry is an important sector, which plays a major role in the growth and economic development of a country in general, and the ever-increasing number of enterprises created in the West region between 2010 and 2016 is a good example.

The West region has 5,074 craftsmen (in 2014), 7,812 (in 2015) divided between the Creative craftsmen, Production craftsmen and Service craftsmen. The Noun division has the largest number of craftsmen, regardless of the type of craft, i.e. 3,230 (in 2014) and 4,285 (in 2015). The Menoua and Bamboutos divisions came last with 125 craftsmen (in 2014) and 232 (in 2015).

Mines

The subsoil potential of the West is quite rich. It includes gold, bauxite and related substances, and uranium. The Mifi division has 5 sites suitable for quarrying/mineral water projects. However, the Bamboutos and Upper-Plateaus divisions, which had none in 2012, have one today.

19.2 Methodology

The information presented in this chapter was obtained from documents issued by the Regional Delegation of Mines, Industries and Technological Development and Regional Delegation of Small and Medium-sized enterprises.

19.3 Sources of documentation

The data in this chapter was drawn from the statistical file of the Regional Service of Mines, Geology and Mining Survey) for the West regional Delegation of MINMIDT and from the statistical services of the West regional Delegation of Small and Medium-sized enterprises.

Chapter 20 : Household final consumption prices

20.1 Présentation

Ce chapitre a pour objectif de présenter l'évolution des prix à la consommation finale des ménages au Cameroun en général et dans la Région de l'Ouest en particulier. Les données révèlent que le taux d'inflation dans la Région de l'Ouest est de 7,0% en 2023 contre 7,4% au Cameroun au cours de la même année. Ce taux d'inflation était de 7,3% contre 6,3% au Cameroun en 2022.

Les taux d'inflation au Cameroun et dans la Région de l'Ouest dépassent le seuil de 3% retenu par la CEMAC dans son dispositif de surveillance multilatérale au cours des deux dernières années.

Selon la note de synthèse sur l'évolution de l'inflation en 2023 publiée par l'INS, les prix à la consommation finale des ménages sont principalement tirés par les prix des produits alimentaires qui ont connu une hausse de 11,1% en 2023. L'inflation au cours de l'année 2023 découle des facteurs nationaux et internationaux. Au niveau national, la réduction des subventions sur le prix des hydrocarbures, les perturbations climatiques et les défis sécuritaires (Région du Nord-Ouest et du Sud- Ouest) ont contribué à alimenter l'inflation. Au niveau international, les tensions liées au conflit Russo-ukrainien, les séquelles de la pandémie de COVID-19, les fluctuations du FCFA par rapport au dollar Américain auraient contribué à l'augmentation du taux d'inflation.

20.2 Méthodologie

Les données utilisées dans ce chapitre proviennent essentiellement des notes de synthèse sur l'évolution des prix à la consommation finale des ménages publiées par l'INS.

20.3 Sources de documentation

Les données ci-dessous sont issues de l'exploitation des notes de synthèses sur les prix publiées par l'INS au cours des 03 dernières années.

Chapter 21: TRANSPORT

21.1 PRESENTATION

In 2019, 15,181 candidates were present at the ordinary sessions of the driving test in the West and 11659 were admitted. This represents a success rate of 76,79%
In 2019, the revenue generated by the issuance of vehicle registration certificates amounted to 54,824,000 CFA francs. The West region had 59 travel agencies, including 19 agencies in the Mifi and 16 in the Menoua divisions.

21.2 Methodology

The methodology used was the harnessing of the activity reports of the West regional Delegation of the Ministry of TransportRegion for the year 2016.

21.3 Sources of documentation

The data in this chapter were drawn from the 2016 activity reports of the West regional Delegation of the Ministry of Transport.

Chapter 22 : POSTS AND TELECOMMUNICATIONS

22.1 Presentation

In the chapter about post and telecommunications in West Region, we found data showing . how parcel traffic, optical fiber in West Region.

22.2 Methodologie and sources

In this chapter, we exploited rapport given to us by CAMPOST and MINCOM. The data of this chapter come from the CAMPOST Regional Delegation of West and MINCOM Regional Delegation of West.

22.3. List of tables

CAMPOST

DÉSIGNATIONS	VALEURS	Observations
Boîtes attribuées	4 698	Le courrier reçu (tout régime confondu)

Boîtes non attribuées	1 710	représente plus de 2/3 du courrier expédié (tout régime confondu). Par ailleurs on observe un faible nombre de colis expédiés ou reçus, ce qui laisse croire que ce pan du service est plus sollicité chez les concurrents notamment les opérateurs privés en national et DHL en international. par contre on peut se satisfaire du volume du envoi EMS en national, cet acquis doit être maintenu et amélioré, non seulement en promouvant davantage ledit service auprès des entreprises et particuliers, mais en apportant un plus d'innovation pour susciter un peu plus d'engouement de la part des clients.
