**ASSESSMENT OF THE EFFECTS OF COVID-19 ON REGIONAL AND  
LOCAL AUTHORITIES (RLAs) IN CAMEROON**

**- Phase 1-**

**List of tables**

**Carried out by the National Institute of Statistics with the support of  
the United Nations Development Programme**

**August 2020**

**Table 1.1: Number of persons tested positive**

Distribution (in %) of municipalities according to the estimated number of persons tested positive for COVID-19 and living in the municipal territory, according to some contextual characteristics, Cameroon, EEECCCTD, 2020

| Contextual characteristics                             | Percentage of municipalities with knowledge of persons living in the Council/City Council and who tested positive for COVID-19 | Number of persons surveyed | Estimated number of COVID-19 cases |                                |                                 |                                  |                     |               | Total        | Number of persons surveyed |
|--|--|----------------------------|------------------------------------|--------------------------------|---------------------------------|----------------------------------|---------------------|---------------|--------------|----------------------------|
|  |  |                            | Less than 5 persons                | From 5 to less than 10 persons | From 10 to less than 50 persons | From 50 to less than 100 persons | 100 persons or more | Does not know |              |                            |
| <b>Region</b>  |  |                            |                                    |                                |                                 |                                  |                     |               |              |                            |
